Major circulatory systems:

1. Cardiopulmonary circulation
2. Systemic circulation

Cardiopulmonary circulation:

1. Arterioles
2. Venules

Systemic circulation:

1. Function?
2. Describe aorta in detail

Coronary Circulation:

1. Describe in detail

Portal circulation:

1. Describe in detail (include portal vein and hepatic vein)

Fetal circulation:

1. Describe in detail!! (Include foramen ovale and ductus arteriosus)

Blood Vessels:

1. Arteries: Description and exception, what they do, layers with description)
2. Capillaries: Description and purpose
3. Veins: Description, what they do

Venous Return: What is this about?

Blood Pressure:

1. Systolic blood pressure
2. Diastolic blood pressure
3. Average
4. Pulse pressure

Pulse:

1. Pulse points
2. What is actually taking place in your pulse?
Circulation Disorders:
1. Congenital heart defects
2. Cyanosis
3. Arteriosclerosis
4. Atherosclerosis
5. Gangrene
6. Phlebitis
7. Varicose veins
8. Hemorrhoids
9. Cerebral hemorrhage
10. Peripheral vascular disease
11. Hypertension
12. Hypotension
13. Transient ischemic attacks
14. Cerebral vascular accident
